- DISASTER PLANNING
- CONTINGENCY PLANNING
- INTERNATIONAL EMERGENCY RESPONSE
- INTERNATIONAL TRACKING OF STAFF
- SECURITY RISK ASSESSMENTS
- REMOTE LOCATION SPECIALISTS
- ENERGY SECTOR SPECIALISTS
- FINANCE & BANKING SECTOR SPECIALISTS
- TRAVEL RISK MANAGEMENT

Mitigation International (MI) works with their clients who have satellite offices and operations in foreign countries. We understand the stress of having employees far removed from your current headquartered operations, and the need to look after these individuals as if they were based in your home country of operation. Our expert advisors have a wealth of international experience, often in hostile environments, where there is a concern for your employees' welfare and well-being.

We understand the need to ensure your operations are not disrupted extensively should there be threats from both natural or man-made disasters. We personally travel to your remote office locations and discuss with your in-country staff, local authorities, and emergency services, and formulate a contingency plan to assist those employees in the event of these possible interruptions to your company's operations.

Our current clients include large oil and gas exploration companies as well as international banking and financial institutions.

flexible solutions for your business needs

- Identifying common and or possible contingencies to natural or man-made disasters
- Compiling information on in-country staff and their roles
- Response design including emergency evacuation
- Technical and communication needs—including live tracking of staff
- Resources and support
- Establishing and maintaining an ongoing partnership with local authorities and emergency services
- Process to deploy and facilitate emergency communication during an incident/disaster
- Process to activate emergency supplies
- Training of all in-country employees to enable them to respond to an emergency and implement plans
- Back-up planning
- Crisis, disaster and continuity management in-country guidebook for employees.

Pre-Deployment Security & Safety Reconnaissance

Mitigation International (MI) works with their clients who have identified new work locations, either offices or remote operational sites such as drilling exploration and mining or other industries such as finance or banking sectors. We deploy our teams to recce your next business location to ensure your staff are fully prepared from both a security and safety perspective and have peace of mind when they are ready to deploy themselves. We specialize in the energy sector (oil/gas/mining) which can place your employees in all corners of the globe, more often than not in inhospitable and remote areas, with the possibility of threats coming from terrorism and/or environmental activism. Our teams are highly experienced in hostile and remote locations.

Flexible solutions for your business needs

Reconnaissance Areas

- Ports - Both Air and Sea
- Hospital and Medical Facilities - including emergency evacuation contingencies and associated medical costs
- Accommodation options
- Food and Supplies options
- Transportation options - including cargo, route safety/security including identifying trucking/rail and air companies
- Road Safety - including refuelling station mapping and vehicle type required according to terrain
- Hostile Environment Analysis - weather/wildlife/conflict etc.
- Cultural Considerations
- Embassy/Consulate in-country support and details
- Bureaucratic Permits and Permissions

* A full detailed report on all of the above will be completed, including attached annexes of pictures, maps, weather conditions etc. to suit our clients needs.

Mitigation International successfully assisted us in completing a number of critical planning and advisory tasks for a rather complex and remote field project in Oman.
